EDUCATION

Lublin University of Technology (Politechnika Lubelska)

Bachelor of Engineering (BEng) in Computer Science - Software Engineering

Final grade: 5.0/5.0 (excellent)

October 2022 - January 2026

LANGUAGES

- Polish (Native)
- English (C1)

ABOUT ME

I am a computer science engineer and software developer from Poland, developing toward a full-stack role. I build modern web applications with a strong focus on security, clean code and user experience. I mainly work with Node.js, TypeScript and Go, using technologies such as Next.js, Hono and PostgreSQL.

PROJECTS

My projects that I'm most proud of.

DoggoPaste

Node.js | TypeScript | Hono | Next.js | PostgreSQL | WebSockets

A web application for sharing code via links and enabling real-time collaboration. Includes client-side encryption and a mechanism for detecting sensitive data.

Homeserver

Linux | Docker | Networking | Cloudflare | Port Forwarding | VPN

Documentation of two home server setup approaches:
using Cloudflare Tunnels and port forwarding. Includes practical, step-by-step guides for self-hosting.

Nuntius Feed

Node.js | TypeScript | Hono | React | MongoDB | RSS

An application for subscribing to RSS and Atom feeds, allowing users to browse, filter, and save articles by language and keywords.

INTERESTS

I'm interested in self-hosting, programming, emerging technologies and staying up to date with IT trends. Outside of IT, I enjoy skiing, history, karaoke, video games, cooking and spending time with animals.
